Notes to the Financial statements

for the year ended 31 March 2026

1. Summary of material accounting policy information

Entity reporting

The reporting entity is Beneficial Insurance Limited (the "Company"). The Company is for-profit, incorporated and domiciled in New Zealand. The Company's registered office is level 3, 445 Karangahape Road, Newton, Auckland.

The Company's primary activity is providing insurance by way of Pet Insurance, Consumer Credit Indemnity ("CCI"), Guaranteed Finance Protection ("GFP") and Mechanical Breakdown Insurance ("MBI"). The Company's parent entity is Beneficial Holdings Limited, a company incorporated in New Zealand.

Statutory base

The Company is registered under the Companies Act 1993 and is an FMC reporting entity under Part 7 of the Financial Markets Conduct Act 2013. The financial statements also comply, where relevant, with the Insurance (Prudential Supervision) Act 2010 and associated regulations.

Basis of preparation

The financial statements of the Company have been prepared in accordance with Generally Accepted Accounting Practice in New Zealand (NZ GAAP). The Company is a for-profit entity for the purposes of complying with NZ GAAP. The financial statements comply with New Zealand equivalents to International Financial Reporting Standards (NZ IFRS) and other applicable Financial Reporting Standards as appropriate for for-profit entities. The financial statements also comply with International Financial Reporting Standards (IFRS).

The financial statements have been prepared in accordance with the requirements of the Financial Markets Conduct Act 2013, Companies Act 1993, Financial Reporting Act 2013 and the Insurance (Prudential Supervision) Act 2010. The financial statements have been prepared on the historical cost basis unless the application of fair value measurement are required by the relevant accounting standards.

The preparation of financial statements in accordance with NZ IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in the accompanying notes.

Presentation of financial statements

The financial statements are presented in accordance with NZ IAS 1 *Presentation of Financial Statements*. The Company has elected to present the Statement of Profit or Loss and Total Comprehensive Income in one statement. The Statement of Profit or Loss and Total Comprehensive Income discloses the analysis of expenses under the function of expense method. This clarifies expenses according to their function as part of cost of insurance revenue and administration activities. The Statement of Financial Position discloses assets and liabilities using the liquidity format of presentation.

Significant judgements, estimates and assumptions

In the application of the Company's accounting policies, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources.

The estimates and associated assumptions are based on historical experience and other factors considered to be relevant. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying the Company's accounting policies

The following are the critical judgements, apart from those involving estimations (addressed separately below), that the Directors have made in the process of applying the Company's accounting policies and that will have the most significant effect on the amounts recognised in financial statements:

- *Assessment of significance of insurance risk:* The Company has identified that all insurance contract issued transfer significant insurance risk to the issuer. This judgment has been made together with advice from the Company's Appointed Actuary. A contract transfers significant insurance risk only if an insured event could cause the Company to pay additional amounts that are significant in any single scenario and only if there is a scenario that has commercial substance in which the issuer has a possibility of a loss on a present value basis upon an occurrence of the insured event, regardless of whether the insured event is extremely unlikely. The assessment of whether additional amounts payable on the occurrence of an insured event are significant and whether there is any scenario with commercial substance in which the issuer has a possibility of a loss on a present value basis involves significant judgement and is performed at initial recognition on a contract-by-contract basis. The type of contracts where this judgement is required are those that transfer financial and insurance risk and result in the latter being the smaller benefit provided.

- *Identification of portfolios:* The Company defines a portfolio as insurance contracts subject to similar risks and managed together. Contracts within the same product line are expected to be in the same portfolio as they have similar risks and are managed together. The Directors consider that there are two portfolios, being Pet Insurance ("Pet") and CCI, GFP and MBI ("Other").

- *Level of aggregation:* The Company applies judgement when distinguishing between contracts that have no significant possibility of becoming onerous and other profitable contracts. The Company also applies judgement when distinguishing between portfolios of insurance contracts that have no significant possibility of becoming onerous. This judgment has been made together with advice from the Company's Appointed Actuary.

- *Assessment of eligibility for Premium Allocation Approach (PAA):* All pet insurance contracts have a coverage period of one year and as such the Company has applied the PAA. For mechanical breakdown, guaranteed finance protection and consumer credit indemnity insurance contracts with a coverage period extending beyond one year, the Company elected to apply the PAA if at the inception of the group of insurance contracts, the Company reasonably expects that it will provide a liability for remaining coverage that would not differ materially from the General Measurement Model as described in NZ IFRS 17 Insurance Contracts. The Directors have undertaken an assessment that confirms applying the PAA produces a measurement of the liability for remaining coverage which does not differ materially from the one that would be produced applying the General Measurement Model for mechanical breakdown, guaranteed finance protection and consumer credit indemnity insurance contracts.

- *Assessment of identifying directly attributable cash flows:* The Company uses judgement in assessing whether cash flows are directly attributable to a specific portfolio of insurance contracts. Insurance acquisition cash flows are included in the measurement of a group of insurance contracts only if they are directly attributable to the individual contracts in a group, or to the group itself, or the portfolio of insurance contracts to which the group belongs. Insurance acquisition cash flows are amortised to profit or loss over the term of the underlying insurance contract. When estimating fulfilment cash flows, the Company also allocates fixed and variable overheads fulfilment cash flows directly attributable to the fulfilment of insurance contracts.

Key sources of estimation uncertainty

The following are key estimations that the Directors have used in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in financial statements.

Insurance contract assets and liabilities

By applying NZ IFRS 17 to measurement of insurance contracts issued, the Company has made estimations in the following key areas. They form part of the overall balances of insurance contract assets and liabilities:

- Future fulfilment cash flows.
- Risk adjustment for non-financial risk.

Technique for estimation of future fulfilment cash flows

In estimating future fulfilment cash flows included in the contract boundary, the Company's process involves consultation with the Appointed Actuary. This process includes a bi-annual and annual review and calculation of provision for claims by Peter Davies who is a Fellow of the New Zealand Society of Actuaries.

The actuarial process used an estimate of future fulfilment cash flows included in the contract boundary as follows:

- Assumed loss ratios - Assumed loss ratios were determined from a consideration of observed historical loss ratios.
- Risk margin - The risk margin was determined for each portfolio. The risk margin is determined after assessing the uncertainty in the central estimate of the outstanding claims estimate for each portfolio.
- Claims handling costs allowance - This allowance is determined after analysing claims related expenses incurred, adjusted for in the expected pattern of payment of claim handling expenses during the life of the claim.
- Future settlement patterns and weighted average term to settlement - The weighted average term to settlement is an aggregate figure for all classes of business based on expected claims development patterns which are in turn derived from an analysis of historical claim settlement patterns. It is expected that approximately 80% of the estimate of future fulfilment cash flows at the reporting date will be incurred within the following three months.
- Inflation and discounting - since the term of the liabilities is less than 12 months no allowance for inflation or discounting has been incorporated.
- Probability of sufficiency - A probability of sufficiency of 90% is considered appropriate when calculating future fulfilment cash flows.

The key assumptions used in determining future fulfilment cash flows are as follows:

	2026	2025
Loss ratio	37%	37%
Claims handling expense ratio	7%	7%
Risk margin - Pet insurance	4%	5%
Risk margin - Other	50%	50%
Probability of sufficiency	90%	90%

Risk adjustment for non-financial risk

The risk adjustment for non-financial risk is the compensation the Company requires for bearing the uncertainty about the amount and timing of the cash flows arising from insurance risk and other non-financial risks such as lapse risk and expense risk. It measures the degree of variability of expected future cash flows and the Company-specific price for bearing that risk and reflects the degree of the Company's risk aversion. The Company determines the risk adjustment for non-financial risk at the entity level and then allocates it to all the groups of insurance contracts. In estimating the risk adjustment, the Company uses the cost of capital method. The method looks at estimating the additional amount of capital required for the amount of uncertainty, and then estimating the expected cost of that capital over the period of the risk. The expected cost of capital is determined at 30% per annum applied to the present value amount of projected capital relating to non-financial risk, which is calculated at 90% confidence level (2025: 90%).

Functional and presentation currency

The financial statements are presented in New Zealand dollars (\$), which is the Company's functional and presentation currency. All financial information is rounded to the nearest thousand dollars unless otherwise stated.

Comparatives

The financial statements are for the year ended 31 March 2026. Comparatives are for the year ended 31 March 2025.

2. Impact of amendments to NZ IFRS

(i) New or amended accounting standards adopted during the financial year

The Company has not adopted any new or amended accounting standards during the financial year.

(ii) Standards, amendments and interpretations to existing standards that are relevant to the Company, not yet effective and have not been early adopted by the Company

NZ IFRS 18 Presentation and Disclosure in Financial Statements will replace NZ IAS 1 Presentation of Financial Statements and applies for annual periods beginning on or after 1 January 2027. The new standard introduces the following key requirements:

- Entities are required to classify all income and expenses into five categories in the statement of profit or loss, namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly-defined operating profit subtotal. Entities' net profit will not change.
- Enhanced guidance on how to group information in the financial statements.

At the reporting date, the Directors are in the process of considering the impact that Standards and Interpretations in issue which are not yet effective are likely to have an impact on these financial statements, including the impact on presentation and disclosure.

3. Insurance revenue

\$ thousands	2026	2025
<i>Contracts measured under the PAA</i>		
Insurance revenue recognised under PAA	21,828	20,046
Total insurance revenue	21,828	20,046

Insurance revenue comprises supplying pet insurance, consumer credit insurance, guaranteed finance protection and mechanical breakdown insurance. Insurance revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Insurance revenue is recognised in accordance with the premium allocation approach (PAA). See note 15 for further commentary. All insurance contracts have been entered into in New Zealand. All insurance contracts are non-participating.

4. Insurance service expenses

\$ thousands	Pet	Other	Total
March 2026			
Incurred claims and other incurred insurance service expenses	7,665	442	8,107
Changes that relate to past service – adjustment to the liability for incurred claims	22	-	22
Amortisation of insurance acquisition cash flows	789	528	1,317
Total insurance expenses	8,476	970	9,446

\$ thousands	Pet	Other	Total
March 2025			
Incurred claims and other incurred insurance service expenses	7,167	471	7,638
Changes that relate to past service – adjustment to the liability for incurred claims	(7)	-	(7)
Amortisation of insurance acquisition cash flows	725	311	1,036
Total insurance expenses	7,885	782	8,667

Insurance claims which arise during the reporting period and are settled during the same period are expensed in the Statement of Profit or Loss and Total Comprehensive Income. Insurance claims which arise during the reporting period but which are not settled at the reporting date are recognised based on the present value of expected future payments.

Insurance claims incurred but not reported (IBNR) are recognised by way of an estimation made by the Company's Appointed Actuary and is based upon historical claims data adjusted for the addition of a risk margin and included at the reporting date in the liability for incurred claims.

5. Administration expenses

\$ thousands	note	2026	2025
Depreciation and amortisation	12 / 13 / 23.1	532	496
Finance costs	23.3	66	99
Remuneration of auditor	7	126	116
Directors fees	24	240	240
Marketing costs		968	962
Other expenses (including employee benefits)		3,682	3,667
Total		5,614	5,580

Employee benefits expense

Breakdown of employee benefits expense as follows:

\$ thousands	2026	2025
Wages and salaries	3,617	3,673
Other employee benefits	97	67
Total employee benefits	3,714	3,740

Short term employee benefits, including holiday entitlement, are current liabilities included in payables, measured at the undiscounted amount that the Company expects to pay as a result of the unused entitlement. Employee benefits expense is included in the Statement of Profit or Loss and Total Comprehensive Income as follows:

\$ thousands	2026	2025
Insurance service expenses	833	806
Administration expenses	2,881	2,934
Total employee benefits	3,714	3,740

6. Investment and other income

\$ thousands	2026	2025
Interest income	832	1,120
Other income	10	99
Total	942	1,219

Interest income comprises interest received from short term bank deposits.

7. Remuneration of auditor

\$ thousands	2026	2025
Audit of the financial statements	15	105
Other assurance services - solvency return	11	11
Non-audit services	-	-
Total	126	116

8. Tax

Income tax expense comprises current and deferred tax.

\$ thousands	2026	2025
Current tax	2,115	1,898
Deferred tax	53	69
Other	(5)	3
Income tax expense	2,163	1,970

\$ thousands	2026	2025
Profit before tax	7,710	7,018
Tax at statutory tax rate 28% (2025: 28%)	2,159	1,965
Other	4	5
Income tax expense	2,163	1,970

The relationship between the expected tax expense based on the domestic effective tax rate of the Company at 28% (2025: 28%) and the reported tax expense in the Statement of Profit or Loss and Total Comprehensive Income is reconciled as follows:

Deferred tax liability

\$ thousands	March 2026	March 2025
Balance at beginning of the period	90	21
Movement in deferred tax	53	69
Balance at end of the period	143	90

Comprising

Employee benefits	(68)	(74)
Insurance acquisition costs	227	196
Property and equipment	22	11
Lease liability net of Right-of-use assets	(16)	(20)
Other provisions	(22)	(23)
Balance at end of the period	143	90

Deferred tax assets and liabilities are carried at the tax rates expected to apply when the assets are recovered or liabilities settled and they are not discounted.

Imputation credit account

\$ thousands	March 2026	March 2025
Balance at end of the period	1,796	2,899

Imputation credits represent tax credits available at the reporting date which can be attached to future dividends paid by the Company.

9. Reconciliation of profit after tax to cash inflow from operating activities

	March 2026	March 2025
\$ thousands		
Net profit (loss) after tax	5,547	5,048
Add non-cash items		
Depreciation and amortisation	63	57
Depreciation on Right-of-use assets	469	439
(Profit) loss on sales of assets	(3)	(1)
Add movements in other working capital items		
Insurance contract assets	85	91
Deferred tax liability	53	69
Other assets	29	236
Payables and accruals	-	62
Current tax liabilities	501	(81)
Provisions	(2)	66
Insurance contract liabilities	377	42
Cash Inflow from operating activities	7,119	6,028

10. Portfolios of insurance contract assets and liabilities

The table below sets out the carrying amounts of portfolios of insurance contract assets and liabilities at the end of reporting date, per class of business:

\$ thousands	note	Pet	Other	Total
March 2026				
Insurance contract assets	11	85	12	97
Insurance contract liabilities	15	1837	652	2,489
Net assets / (liabilities)		(1752)	(640)	(2,392)
March 2025				
Insurance contract assets	11	108	74	182
Insurance contract liabilities	15	1817	295	2,112
Net assets / (liabilities)		(1709)	(221)	(1,930)

11. Insurance contract assets

Insurance contract assets relate to premiums due for remaining coverage that are due but have yet to be received by the Company at the reporting date. Ageing of insurance contract assets at the reporting date is noted as follows:

Aging of premiums receivable						
\$ thousands	not past due	0-3 mths	3-6 mths	6-12 mths	over 12 mths	Total
March 2026						
Premiums receivable	-	198	49	-	-	247
Less expected credit loss						(50)
Insurance contract asset						97
March 2025						
Premiums receivable	-	253	154	-	-	407
Less expected credit loss						(225)
Insurance contract asset						182

Insurance contract assets are stated inclusive of GST where applicable. Insurance contract assets are receivable within 12 months from the reporting date.

12. Property and equipment

Accumulated depreciation	(17)	(31)	(244)	(28)	(320)
Net book value	9	48	194	55	306

Depreciation is provided on leasehold improvements, computers and software, office furniture and equipment and motor vehicles, at the following rates.

Asset class	Method	Depreciation %
Leasehold Improvements	diminishing value	10%
Furniture and Fittings	diminishing value	15% - 25%
Office and computers	diminishing value	15% - 67%
Motor Vehicles	diminishing value	30%

Depreciation methods, useful lives and residual values are reviewed at each reporting date.

There were no impairment losses for the Company for the year ended 31 March 2026 (2025: \$nil).

13. Intangible assets

Amortisation is provided on website costs at the following rates. Software was not available for use at the reporting date and as such no amortisation has been accounted for.

Asset class	Method	Depreciation %
Website costs	diminishing value	20%

Amortisation methods, useful lives and residual values are reviewed at each reporting date.

There were no impairment losses for the Company for the year ended 31 March 2026 (2025: \$nil).

14. Payables

	March 2026	March 2025
\$ thousands		
GST payable	360	354
Other payables	322	328
Payables	682	682

Other payables represent liabilities for goods and services provided to the Company prior to the end of the financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition. Payables are due within 12 months from the reporting date.

15. Insurance contract disclosures

The Company accounts for all insurance contracts applying the Premium Allocation Approach (PAA). For the classes of business that do not qualify for PAA, the Directors have undertaken an assessment that confirms applying the PAA produces a measurement of the liability for remaining coverage that does not differ materially from the one that would be produced applying the General Measurement Model. The Company holds no reinsurance for insurance contracts issued.

Key types of insurance contracts issued

The Company issues the following types of insurance contracts that are accounted for in accordance with NZ IFRS 17 Insurance Contracts:

Pet insurance policies:

These insurance contracts include a variety of cover options regarding comprehensive surgical and medical cover for pets. These insurance contracts are for a 12 month period and include a pre-agreed value of cover.

Mechanical breakdown insurance policies:

These insurance contracts include a variety of cover options regarding mechanical breakdown cover for motor vehicles. These insurance contracts are for a 12 to 36 month period and include a pre-agreed value of cover.

Guaranteed finance protection insurance policies:

These insurance contracts include a variety of cover options regarding a shortfall between insurance proceeds and the amount of finance owing on a vehicle that has been in an accident. These insurance contracts are for a 12 to 60 month period and include a pre-agreed value of cover.

Consumer credit indemnity insurance policies:

These insurance contracts include a variety of cover options regarding payment of loan obligations in the event of serious injury, sickness, unexpected unemployment, or even death. These insurance contracts are for a 12 to 48 month period and include a pre-agreed value of cover.

15. Insurance contract disclosures (continued)

The following table shows the reconciliation from the opening to the closing balances of the net liability for the remaining coverage and the liability for incurred claims for insurance contracts measured under PAA.

	Asset for insurance acquisition cash flows	Liability for remaining coverage	Liability for incurred claims		Total
			Estimates of present value of future cash flows	Risk adjustment for non-financial risk

The liability for remaining coverage does not include a loss component.

16. Asset for insurance acquisition cashflows

The following table shows the reconciliation from the opening to the closing balance for assets for insurance acquisition cash flows.

\$ thousands	Pet	Other	Total
March 2026			
Opening balance	490	210	700
Additions	846	581	1427
Amount amortised during the period due to allocation to the related group of contracts	(790)	(527)	(1,317)
Impairment losses	-	-	-
Closing balance	546	264	810
March 2025			
Opening balance	342	102	444
Additions	873	419	1,292
Amount amortised during the period due to allocation to the related group of contracts	(725)	(311)	(1,036)
Impairment losses	-	-	-
Closing balance	490	210	700

It is expected that the balance for insurance acquisition cash flows at the reporting date will be allocated to the Statement of Profit or Loss and Total Comprehensive Income over the following 12 months.

17. Distributions to shareholder

Directors declared and paid the following dividends to the shareholder; Beneficial Holdings Limited. The two independent directors approved the Solvency certificates.

\$ thousands		Dividend declared	value
Dividend	FY2026 interim	22/09/2025	6,200
Dividend	FY2026 final	26/03/2026	2,100
Total dividends to shareholder			8,300

The dividend paid in the prior year was \$3,900,000 (interim: \$1,900,000 and final: \$2,000,000).

18. Contributed equity

The Company does not have authorised capital or par value in respect of the one share issued. The share is fully paid. The share entitles the holder to dividends and the residual assets of the Company.

Contributed equity also includes capital contributions of \$675,000 by the shareholder in March 2016 to meet the cash flows relating to the settlement of an outstanding tax liability at the time.

19. Insurance business disclosures

19.1 Solvency Standard

Under Section 55 of the Insurance Prudential Supervision Act 2010, "IPSA", the Company is regulated by a Solvency Standard. Under this standard, Beneficial is required to maintain a Solvency Margin whereby the Company's Actual Solvency Capital must be in excess of the minimum Solvency Capital as defined under the standard. Beneficial's Appointed Actuary performs this calculation based on the Financial Statements.

\$ thousands	March 2026	March 2025
Actual solvency capital	16,959	15,597
Minimum solvency capital requirement	3,000	3,000
Solvency margin	13,959	12,597
Solvency ratio	565%	520%

The above solvency ratio is calculated based on the Interim Solvency Standard issued by the Reserve Bank of New Zealand on 1 January 2023 and related amendment Standards.

19.2 Credit rating

On 18 September 2025 credit rating agency, AM Best reaffirmed the Company's Financial Strength Rating at B++ (Good).

20. Financial instruments

\$ thousands	March 2026	March 2025
Financial assets - amortised cost		
Cash and cash equivalents	130	155
Short term investments	16,550	13,400
Insurance contract assets	97	132
Total financial assets - amortised cost	16,777	13,737
Financial liabilities - amortised cost		
Other amortised cost:		
Payables	322	328
Lease liabilities	518	1,003
Total financial liabilities - amortised cost	840	1,331

The carrying amounts approximate fair value.

20.1 Financial assets – under NZ IFRS 9

All of the Company's financial assets have been held with a business model to collect contractual cash flows that represent solely payments of principal and interest all were measured at amortised cost.

Impairment of financial assets

The Company assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortised cost. The Company applies the simplified approach to providing for expected credit losses prescribed by NZ IFRS 9, which permits the use of the lifetime expected losses for all premiums receivables. Given the low risk of default on other financial assets (primarily short-term deposits with financial institutions with a strong credit rating), other expected credit losses have been assessed to be immaterial.

20.2 Short term investments

Deposits are classified as at amortised cost under NZ IFRS 9.

\$ thousands	March 2026	March 2025
Bank deposits		
Maturity from balance date		
0 - 3 months	5,750	5,000
4 - 6 months	2,160	1,200
7 - 9 months	-	2,500
10 - 12 months	8,650	9,700
Total short term investments	16,550	18,400

All short-term investments are bank deposits with Westpac, TSB, BNZ, ASB and Kiwibank with maturity dates within 12 months of balance date.

21. Risk management

The financial condition and operational results of the Company are impacted by a number of risks:

- Financial – market risk, credit risk, financing and liquidity risk
- Non-financial – underwriting risk, compliance risk and operational risk

The Board's objective is to satisfactorily manage these risks in line with the Board approved Risk Management Policy. Procedures are in place to control, mitigate, and report on risks faced by the Company in a timely manner to the Board. The Board meet monthly to review Management's reporting on risks or as when a significant risk is escalated. Managers are responsible for understanding and managing their operational and compliance risks.

The Board is involved each month in reviewing the effectiveness and efficiency of management processes, risk management and financial controls to ensure adequate oversight and compliance. Assets are regularly monitored to ensure there are no material asset and liability mismatching issues and exposure to risks including liquidity and credit risks are maintained within acceptable limits.

21.1 Market risk

Market risk is the risk arising from adverse movements in interest rates or in related derivatives.

- Interest rate risk is the risk that the value of assets or liabilities will change because of changes in interest rates. The Company manages its exposure by holding predominately short-term deposits with the major NZ trading banks – refer note 20.2. Members of the investment sub-committee of the Board monitor each month the concentration and maturities of short-term deposits. Interest rates on the term deposits are fixed at inception and paid either quarterly or at maturity.

21.2 Credit risk

Credit risk is the risk of loss arising from a party to a contract or transaction not being able to meet its obligations or defaulting on its commitments.

The Company is exposed to credit risk through its insurance contract assets, bank balances and term deposits.

There are otherwise very limited credit or other counterparty exposures. Arrears of insurance contract assets are closely monitored and reported on. Payment default will also result in the termination of the insurance contract with the policyholders, eliminating both the credit risk and insurance risk for the unpaid balance.

Cash deposits and investments are limited to banks with a minimum Fitch A credit rating. The following table provides information regarding the Fitch credit rating for cash deposits and investments.

\$ thousands Fitch's Credit Rating	March 2026	March 2025
AA	10,000	7,700
A +	1,160	1,165
AA-	5,550	-
BBB +	-	700
Total	16,680	18,555

During the March 2025 financial year, the credit rating of one bank was downgraded from A- to BBB+. No further deposits were scheduled to be placed with this bank once the remaining investment matured.

Concentration of risk

The Company's exposure is principally through the term deposits held with five major trading banks in New Zealand set out at note 20.2.

21.3 Underwriting risk

Underwriting risk comprises insurance risk, policyholder behaviour risk and expense risk:

- Insurance risk: the risk transferred from the policyholder to the Company, other than financial risk. Insurance risk arises from the inherent uncertainty about the occurrence, amount or timing of claims
- Policyholder behaviour risk: the risk that a policyholder will cancel a contract (i.e. lapse or persistency risk) or increase or reduce premiums
- Expense risk: the risk of unexpected increases in the administrative costs associated with the servicing of a contract (rather than in the costs associated with insured events).

Insurance risk

Insurance risk refers to the risk that claims arising are higher or lower than assumed in pricing due to bad experience, weakness in controls over underwriting or portfolio management, or claims management issues.

Initial claims determination is managed by experienced claims staff. The valuation of the liability for incurred claims is performed by Beneficial's Appointed Actuary using actuarial valuation models which include a risk margin for uncertainty.

The Directors set the Company's strategy for accepting and managing insurance risk. The Directors continuously reviews the Company's underwriting strategy in the light of evolving market pricing and loss conditions and as opportunities present themselves.

A key component of the management of insurance risk for the Company is a disciplined underwriting strategy that is focused on writing quality business. Product pricing is intended to incorporate appropriate premiums for each type of risk assumed by the Company.

Almost all insurance contracts issued by the Company are renewable annually. The ability to reprice contracts on renewal in response to changes in policyholder risk profiles, claims experience and market considerations is a significant mitigant to pricing insurance risk. Insurance contracts may also contain other features that constrain insurance risk – e.g. the use of deductibles, co-pay and capping on the maximum permitted loss for specific risks or events.

21.3 Underwriting risk (continued)

The Directors receive reporting with regard to the performance of insurance contracts, disaggregated between pet insurance and other insurance. This reporting includes the following information which assists with the management of insurance risk:

- average gross written premium per policy
- total number of policies written
- new policies written
- policies cancelled / closed
- number of claims paid
- average value of claims paid per claim
- total value of claims paid

This information is presented on a monthly basis and includes comparative data for the current preceding 23 months so that trends can be properly assessed and considered.

Policyholder behaviour risk

Policyholder behaviour risk is considered when designing products – e.g. by means of additional charges on the early surrender of contracts in order to recover acquisition cash flows. Retention is monitored and benchmarked against historical experience. From time to time, management may implement specific initiatives to improve retention.

Expense risk

Expense risk is managed through the annual budgeting process and regular expense analyses.

Concentrations of risk

The Company sells pet, mechanical breakdown, consumer credit and guaranteed finance protection insurance. While a large component of the Company's business relates to the sale of pet insurance, this is spread over a number of policy holders where no policy holder would individually have annual premiums exceeding 1% of the Company's total insurance revenue. All of the Company's total insurance revenue is billed in New Zealand Dollars and almost all of the Company's policy holders are located in New Zealand.

Sensitivity analysis

The table below analyses how profit or loss / equity would have increased (decreased) if changes in underwriting risk variables that were reasonably possible at the reporting date had occurred.

\$ thousands	Impact on profit of loss / equity		
	Movement in assumption	2026	2025
Expected future claims development	+10%	(305)	(208)
	-10%	244	176

Claims development

The Company has not presented information with regard to the development of claims given uncertainty about the timing of claims payments is typically resolved within one year.

21.4 Financing and liquidity risk

Maturity analysis

\$ thousands	0-6 mths	7-12 mths	13-24 mths	25-60 mths	over 60 mths	Total
March 2026						
Financial assets						
Cash and equivalents	130	-	-	-	-	130
Short term investments	7,900	8,650	-	-	-	16,550
Insurance contract assets	97	-	-	-	-	97
	8,127	8,650	-	-	-	16,777
Financial liabilities						
Payables	322	-	-	-	-	322
Lease liabilities	276	265	-	-	-	541
	598	265	-	-	-	863

March 2025

Financial assets						
Cash and equivalents	155	-	-	-	-	155
Short term investments	6,200	12,200	-	-	-	18,400
Insurance contract assets	182	-	-	-	-	182
	6,537	12,200	-	-	-	18,737
Financial liabilities						
Payables	328	-	-	-	-	328
Lease liabilities	276	276	541	-	-	1,093
	604	276	541	-	-	1,421

The above contractual cash flows for financial assets and financial liabilities of the Company have not been discounted.

Financing and liquidity risk is the risk that the Company will not be able to meet its obligations as they fall due, because of a lack of liquid assets or access to funding on acceptable terms. All insurance contract liabilities are expected to be settled within twelve months of the reporting date. The carrying amount in the financial statements for insurance contract liabilities is considered to equal the amount that the Company would need to settle if payment were demanded. Given the availability of cash and cash equivalents and short term investments, the Directors consider there is sufficient liquidity for the Company to meet all insurance contract liabilities at the reporting date.

The Company mitigates financing and liquidity risks by actively managing its operational risks. These include:

- The maintenance and use of sophisticated management information systems, which provide up to date, reliable data on the risks to which the business is exposed at any point in time.
- The use of actuarial models based on historical data to calculate premiums and monitor claim patterns.
- The management of assets and liabilities is closely monitored to match the expected pattern of liability payments with the maturity dates of assets.
- Terms and conditions of insurance contracts. The majority of direct insurance contracts written are entered into on a standard form. There are no special terms and conditions in any non-standard contracts that have a material impact on the financial statements.
- Active claims management by analysing experience, trends and other relevant factors.

22. Capital risk management

The Company's capital includes its share capital and retained earnings at 31 March 2026 of \$12,976,000 (2025: \$15,729,000).

The Company's policy is to maintain a strong capital base to ensure it continues to operate as a going concern, to maintain policyholder, supplier and market confidence and to sustain future development of the business. The Board regularly monitors current and future capital requirements and costs.

The Company also manages capital in accordance with the requirements of the Insurance (Prudential Supervision) Act 2010 and the solvency standard issued by the Reserve Bank of New Zealand.

Outside the solvency requirements detailed in note 19.1, there are no externally imposed financial covenants arrangements that must be observed.

There has been no change in the Company's management of capital during the years ended 31 March 2025 and 2026.

23. Right of use assets and lease liabilities

The Company is leasing office premises and IT equipment.

23.1 Right-of-use assets

\$ thousands	March 2026	March 2025
Cost		
Opening balance	930	1304
Additions	-	65
Depreciation for the year	(469)	(439)
Closing balance	461	930

23.2 Lease liabilities

The maturity of the contractual undiscounted cashflows is as follows:

\$ thousands	March 2026	March 2025
Less than one year	541	552
One to five years	-	541
More than five years	-	-
Total undiscounted lease liabilities	541	1093

The maturity of the lease liabilities included in the Statement of Financial Position is as follows:

\$ thousands	March 2026	March 2025
Less than one year - current	518	485
One to five years	-	518
More than five years	-	-

Interest on lease liabilities	66	99
Recognised in the statement of comprehensive income	535	538

23.4 Amounts recognised in the statement of cash flows

\$ thousands	March 2026	March 2025
Principal element of lease liabilities	485	418
Interest paid on lease liabilities	66	99
Total cash outflow for lease	551	512

23.5 Sublease

Within the shared services agreement (refer to note 24) the Company subleases part of the office premises to Broadlands Finance Limited, a related party. The leased payments are payable monthly and are reviewed on a two yearly basis depending on the office space leased by Broadlands Finance Limited. The Company has elected to classify the sublease as an operating lease, on the basis that Broadlands Finance Limited does not have the right to direct the use of the office space it is leasing. Shared services rent recharge income for the year ended 31 March 2026 was \$92,254 (2025: \$97,100) and is included in "Other income" in the Statement of Profit or Loss and Total Comprehensive Income.

\$ thousands	March 2026	March 2025
Within one year	92	92
one to two years	-	92
two to three years	-	-
Total	92	184

24. Transactions with related parties

Executive Trustees Limited	Rent	(527)	(492)
Funds collected and remitted from related parties			
Broadlands Finance Limited	Insurance premiums	100	106
		38	40
		41	

The parent company of Beneficial Insurance Limited is Beneficial Holdings Limited, a company incorporated in New Zealand.

Broadlands Finance Limited and Executive Trustees Limited are related to the Company by way of common shareholding.

On 1 October 2019 Beneficial Insurance Limited and Broadlands Finance Limited entered into a shared services agreement. On 1 April 2026 the agreement was revised to incorporate changes in shared service costs. The shared services agreement includes rental and salary oncharge costs charged by Beneficial Insurance Limited to Broadlands Finance Limited and during the financial year ended 31 March 2026 these amounted to \$92,254 and \$228,084 respectively (2025: \$97,100 and \$225,358 respectively). The salary oncharge costs of \$228,084 have been offset against employee benefits expense within administration expense in the Statement of Profit or Loss and Total Comprehensive Income.

The amounts receivable / (payable) are unsecured and no guarantees are in place. No interest is charged on amounts owing between related entities. No receivables or payables are impaired as at 31 March 2026 (2025: \$Nil).

24. Transactions with related parties (continued)

Directors remuneration

\$ thousands	March 2026	March 2025

Salaries and other short term benefits paid	250	247

25. Contingent liabilities

There are no contingent assets or liabilities at the reporting date (2025: \$Nil).

26. Capital commitments

There were capital commitments of \$35,000 at the reporting date relating to software services (2025: \$Nil).

27. Subsequent events

Subsequent to the end of the reporting period, the Company has entered into an agreement for software services of \$177,900 (2025: \$168,050). The Directors are not aware of any other matters or circumstances since the end of the reporting period, not otherwise dealt with in the financial statements that have significantly or may significantly affect the operations of the Company.

Corporate governance and disclosures

Statement of responsibility for financial statements

The Directors are responsible for the maintenance of adequate accounting records and the preparation and integrity of the financial statements and related information.

The Directors are also responsible for the systems of internal control and risk management. These are designed to provide reasonable, but not absolute, assurance as to the reliability of the financial statements, and to adequately safeguard, verify and maintain accountability for assets, and to prevent and detect material misstatements. Appropriate systems of internal control have been employed to ensure that all transactions have been executed in accordance with authority and correctly processed and accounted for in the financial statements. The systems are implemented and monitored by suitably trained personnel with an appropriate segregation of authority and duties. Nothing has come to the attention of the Directors to indicate that any material breakdown in the functioning of these controls, procedures and systems has occurred during the year ended 31 March 2026.

In the opinion of the Directors:

- the Statement of Profit or Loss and Total Comprehensive Income is drawn up so as to present fairly, in all material respects, the results of operations of the Company for the year ended 31 March 2026;
- the Statement of Financial Position is drawn up so as to present fairly, in all material respects, the state of affairs of the Company as at 31 March 2026;
- the Statement of Cash Flows is drawn up so as to present fairly, in all material respects, the cash flows of the Company for the year ended 31 March 2026; and,
- there are no reasons to believe that the Company will not be able to pay its debts as and when they fall due.

Directors' statement

Annual report to the shareholder of Beneficial Insurance Limited for the year ended 31 March 2026

Pursuant to sections 208 and 209 of the Companies Act 1993, the directors present their annual report comprising these audited Financial Statements for the year ended 31 March 2026 and the independent auditor's report thereon.

This report is to be read in conjunction with the Financial Condition Report for the year ended 31 March 2026 from the Appointed Actuary.

With the agreement of the shareholder, the Company has taken advantage of reporting concessions available to it under section 211 (3) of the Companies Act 1993. The information required by paragraphs (a) and (e) to (j) of section 211 (1) of the Companies Act 1993 is therefore not disclosed.

Signed in accordance with a resolution of the directors:

Opinion

We have audited the financial statements of Beneficial Insurance Limited (the Company), which comprise:

- the statement of financial position as at 31 March 2026;
- the statement of profit or loss and total comprehensive income for the year then ended;
- the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, which include material accounting policy information.

In our opinion, the financial statements on pages 2 to 16 present fairly, in all material respects, the financial position of the Company as at 31 March 2026, and of its financial performance and its cash flows for the year then ended in accordance with New Zealand equivalents to International Financial Reporting Standards and International Financial Reporting Standards.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (New Zealand) (ISAs (NZ)). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report.

We are independent of the Company in accordance with Professional and Ethical Standard 1 *International Code of Ethics for Assurance Practitioners (including International Independence Standards) (New Zealand)* issued by the New Zealand Auditing and Assurance Standards Board and the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code)*, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our firm carries out other services for the Company in the areas of assurance over the Company's solvency return. In addition, certain partners and employees of our firm may deal with the Company on normal terms within the ordinary course of trading activities of the Company. The provision of these other services and relationships have not impaired our independence as auditor of the Company.

Key audit matter

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. The key audit matter identified below was addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

Why we considered this to be a key audit matter	How our audit addressed the key audit matter
Completeness and valuation of insurance contract liabilities As disclosed in Note 10 of the Company's financial statements, the Company has insurance contract liabilities of \$2,489,000 (2025: \$2,112,000). The Company's insurance contract liabilities were significant to our audit due to the size of these balances, and the subjectivity, complexity, and uncertainty inherent in estimating the expected cash flows and profit margins, relevant to their determination. Determining expected cash flows include estimates of future premiums, maintenance expenses, claims, and require the use of key assumptions including discontinuance rates and discount rates. Management has engaged an external actuarial expert to estimate the Company's insurance contract liabilities as at 31 March 2026.	Our audit procedures among others included: ▪ Assessing the accounting policies, measurement models, and methodologies used against the requirements of NZ IFRS 17 Insurance Contracts; ▪ Evaluating the design of the key controls over insurance contract origination, ongoing administration, claims management and reporting and the integrity of the related data; ▪ Understanding and evaluating the Company's internal controls relevant to the accounting estimates used to determine the completeness and valuation of the Company's insurance contract liabilities; ▪ Evaluating the competence, capabilities, objectivity and expertise of Management's external actuarial expert and the appropriateness of the expert's work for determining insurance contract liabilities; ▪ Holding discussions with Management's external actuarial expert and applying professional scepticism to when evaluating the insurance contract liabilities; ▪ On a sample basis, agreeing the data provided to Management's external actuarial expert to the Company's records; ▪ Evaluating completeness of datasets used by the Company's expert by agreeing the dataset to the general ledger on an aggregate basis; ▪ Engaging our own independent actuarial expert to assist in understanding and evaluating: ○ the work and findings of the Company's external actuarial expert engaged by Management; ○ the Company's actuarial methods and assumptions to assist us in challenging the appropriateness of actuarial methods and assumptions used by Management; and ○ Evaluating the selection of methods and assumptions with a view to identify management bias. ▪ Evaluating the related disclosures (including the material accounting policy information and accounting estimates) about insurance contract liabilities, and the risks attached to them, which are included in Notes 15 and 21.3 of the Company's financial statements.

Other information

The Directors are responsible for the other information. The other information comprises the Statement of Responsibility for Financial Statements, Directors' Statement and Company Directory on pages 17 to 19 (but does not include the financial statements and our auditor's report thereon), which we obtained prior to the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of audit opinion or assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the financial statements

The Directors are responsible, on behalf of the Company, for the preparation and fair presentation of the financial statements in accordance with New Zealand equivalents to International Financial Reporting Standards and International Financial Reporting Standards, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible on behalf of the Company for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless those charged with governance either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (NZ) will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the decisions of users taken on the basis of these financial statements. A further description of the auditor's responsibilities for the audit of the financial statements is located at the XRB's website at:

<https://www.xrb.govt.nz/assurance-standards/auditors-responsibilities/audit-report-2/>

Who we report to

This report is made solely to the Company's shareholder. Our audit work has been undertaken so that we might state those matters which we are required to state to the shareholder in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholder for our audit work, for this report or for the opinions we have formed.

The engagement partner on the audit resulting in this independent auditor's report is Nigel de Frere.
